

## SmartCount Batch Count Controller

The SmartCOUNT Batch-Counting Controller is designed to interface with a variety of different machines to easily add batch counting capabilities to production lines for bundling.

The Model F-1 interfaces to feeding devices including continuous feed friction & vacuum feeders and the Model D-1 interfaces to the Victory BatchDrop for inline accumulating / bundling.

The SmartCOUNT is equipped with a programmable counter and photo-sensor for "counting" a variety of different types of products up to 99,999 pieces.

Simple communication I/O can either pause or trigger the upline feeding/conveying device.

### Utilities Requirements

115vac, 1A, 60Hz

### Controls

Programmable Counter with Time Delay Relay

Counter set, Photo-sensor

Input & Output I/O Cables

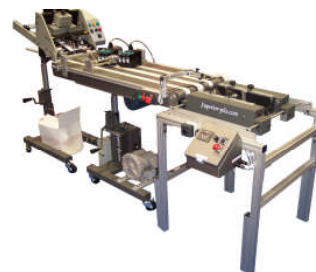

Time Delay setting

### Other

Compact footprint. Easily mounts to any machine

Used in this system to count batches to a flat belt conveyor

Used in this system to count fixed batches of production mail
