

CHAMPION Conveyors—Line Card

CHAMPION Flighted Conveyor

Designed to increase speed and maximize Automatic L-Sealer production lines. Available in a variety of lengths, its dual offset chain design provides smooth operation and transfer while maintaining stack integrity. Lengths from 6 to 90 feet! Optional belted infeed for easy transfer integration. Available in single and dual lug.

CHAMPION Vacuum Table

The compact footprint and roll in/out design makes this transport ideal for in-line and/or offline use for printing, scanning, tipping, drying, and more. Available in 6-ft length.

CHAMPION Bundling Conveyors

Designed to count and accumulate products for end of line bundling. Easy set up allows the operator to choose the bundle size count. Height adjustable and compact for use with many types of collators, wrappers, and more. Includes PLC based controller with sensors in/out-puts and 4-in tall side rails.

CHAMPION Stacking Conveyors

This slow-moving conveyor provides end of line stacking capabilities. Variable speed allows for tight shingling of the collected products for easy manual removal. 6-ft, 9-ft, and 12-ft lengths available.

CHAMPION Split Chamber Belt Conveyors

This open-frame conveyor provides flexibility for applications requiring top and/or bottom scanning. Adjustable belt modules accommodate a wide variety of product widths and lengths. Variable speed design allows for use with just about any paper processing production lines. 3-ft to 12-ft standard lengths.
