XM Series Friction Feeders...

Experience versatility and dependability that makes the XM Series Friction Feeders the most flexible and affordable solutions in the market. Ideal for dispensing and batch counting the widest variety of paper type products!

Victory BD Accumulator/Dropper...

Designed to work with XM Series Friction Feeders for turn-key batch counting systems or as part of other paper processing systems for bundle stacking when combined with the SmartCount Batch Count Controller.

XM-88 Feed & Vacuum Transport...

The Xtreme XM-88 is a turn-key system for product feeding and scanning / bar-code reading / printing, labeling, and more. With vacuum assist on the feeder and a full length vacuum chamber on the discharge, product is accurately & consistently fed and securely held all the way through.

XM-100 Bulk Loader...

Add stacking capacity to all types of paper type feeders including the XM Series Friction Feeders – up to 6 feet of shingled product! Height adjustable and equipped with casters for easy mobility.

XM-Batch Tray Systems...

XM-BT Systems are perfect for Print Fulfillment and Contract Packaging users. No more hand counting, scale weighing, spearing, or messy stacks! It's the perfect solution for automating manual "counting" processes.

XM-Reverse Tray System...

The XM-RT is ideal for inline batching over existing flighted infeed conveyors. This system provides feeding/batch counting with the flow or against the flow with finished batches up to 1/4" thickness.

XM-Reverse Tray with Conveyor System...

The XM-RTC is the perfect "roll-up" solution for contract packaging and print fulfillment users to automate batch counting on Auto L-Bar Sealers and other belted infeed wrappers/sealers! This system is ideal for inline batching and top cover sheet placement.
