

Systems—Line Card

XC Collation Systems ...

Simple, plug & play integration! Systems are configurable with inline and right-angle mounting options. Features SmartControl Collator Interface for seamless product collation. 2 to 100 stations!

BD Batch Accumulation Systems...

Modular batch-counting systems that provide a simple, easy to use roll-up system to most shrink wrapper systems, banders, stappers, and more. Also great for offline applications.

VB Systems...

The *All-In-One* solution for your addressing, tipping, labeling, and scanning applications. The high-speed XM-81 product feeder delivers product to the CHAMPION 6-ft Vacuum Table and out to the 9-ft CHAMPION Stacking Conveyor at speeds up to 500 ft/min.

XpressStar...

Mobile system ideal for high-speed **top and bottom**: labeling, barcode/UPC scanning, printing, and verification/inspection. Feeds a wider range of product sizes and types including open edge, tri-fold, z-fold, and more. Use off-line with existing stacking conveyors *or* inline into any finishing system.

PrintStar...

Print Fulfillment System is the perfect solution for batch-counting, marking/coding, and accumulating batches of cards at speeds over 70,000 pieces per hour. Ideal for processing phone cards, gift cards, promotional cards, carriers, scratch-off cards, and more.

Pulsar...

Automatically accepts collated sheets from any upstream system, jogs the stacks to retail quality, and automatically delivers to the lugged infeed of the existing wrapping or finishing system.
