

DESIGNED TO IMPROVE CAPACITY & FEEDING CONSISTENCY

Superior-PHS Bulk Load Conveyors reduce the frequency of reloading product and increase the capacity of each feeder's hopper. Bulk Load Conveyors reduce manual labor, increase R.O.I., and maximize efficiency and system productivity.

Available in standard lengths of 2', 3', 4', 6', 10', and 12', Superior-PHS Bulk Load Conveyors mount directly to the feeder. Adjustments for different product lengths are easily performed with built in locking handles and guide rollers for smooth and repeatable positioning. Custom lengths are available, contact us to learn more. A photo-sensor mounted in the hopper of the feeder automatically starts and stops the Bulk Load Conveyor while maintaining a consistent stack height of product.

6' Bulk Load Conveyor shown with XM-12 Feeder

3' Bulk Load Conveyor shown with XM-1200 Feeder

SPECIFICATIONS

Power	115vac, 5A
Controls	Variable speed, On/Off, Forward, Reverse
Max Product Width	3" W x 4" L (smaller options available)
Min product Width	12" W x 14" L (larger options available)

4' Bulk Load Conveyor shown with XM-1 Feeder
