

Automatic Banding Solutions from Superior-PHS feature our Band Sweep module that integrates right on to the Flighted infeed conveyor and provides the motion to advance the batch sets into the bandler ensuring that the band is centered on the package and eliminates labor of manually placing the batch set in the bandler.

Paper banding solutions are eco-friendly in lieu of plastic wrap machines.

Available in multiple configurations based on your specific application but modular enough to accommodate a variety of product types and batch sizes.

Superior Performance...Superior Value!
