SEMI-AUTOMATIC BATCH COUNTING SOLUTIONS

BT Systems are an optimal entry-level solution for automating your counting process. These semi-automated offline systems eliminate the need for hand counting, scale weighing, and spearing. Stacks are neatly fed into the BT Batching Tray for manual removal and come standard with a trigger assemble to automate the next batch cycle. Great for use near banders, wrappers, strappers, padders, cartoners and more. Batching trays are available on all Superior-PHS feeder models.

These tabletop and roll-around systems can be used throughout your production, packaging, and fulfillment areas to prepare stacks for your finishing process. Below are the two most popular.

The **XM-1200BT** is a powerful workhorse built for 24/7 production environments. The XM-1200 is a high-performing batch count feeder that comes standard with Electro-Mechanical Double Detect, Rotating Gate, and Vacuum Assist to feed the widest range of materials including glossy material, paper sheets, tri-fold and z-fold, and so much more.
