

ASSEMBLY INSTRUCTIONS – MOUNTING STANDS

ITEM 1: LOW TOE BASE – The base of the stand comes in three different styles depending on the feeder model purchased (base shown is for the XM-1/XM-12HS Feeders). The base comes complete with locking swivel casters and swivel base pedestal extensions.

ITEM 2: UPRIGHT – The upright comes in two different sizes; short and tall. The short upright is used on the “30” models and the tall upright is used on the “40” models. The upright houses the adjustment tube / handle.

ITEM 3: HEAD – The head attaches to the upright and provides the foundation for mounting the XM-Series Feeder or other machines including labeling heads and more.

ITEM 4: PIVOT MOUNT ASSEMBLY – The pivot mount assembly is included for feeder models XM-1 and XM-12HS when a stand is also ordered. This assembly provides mounting capabilities for the XM-1 and XM-12HS and allows for inline* or 90-degree mounting. The rear mount can be adjusted inward and outward to change the dispensing angle of the feeder.
